

AKETEK PRO-X

From the original inventor of Auto Darkening Welding Helmets

BENEFITS

- Suitable for MIG, TIG, MAG, plasma cutting and grinding.
- Auto-darkening filter with shade 3 in light state and a range of shades 8-12 in dark state.
- Large viewing area (100 x 54 mm).
- True color filtering.
- Always On - ready to pick up and start to weld.
- Fast switching when striking the arc (0.1 ms).
- Can be used in sunlight. The sensors react to all types of welding arcs, including TIG above 5A.
- Lifetime of the built in battery cell is 10+ years.
- Soft and comfortable headgear with multiple adjustments.
- Protective cover plates, outside and inside with scratch resistant coating.
- High robustness and meets requirements for high speed particles (120 m/s).
- Lightweight - 520 g.

*A ROBUST HELMET
FOR TOUGH WORK*
